

What Cowork Did for Me

Jordan Rivera · Last 30 days (demo) (2026-08-19 → 2026-09-18) · Methodology v4

Report inspired from [“What I Did — GitHub Copilot Impact Report”](#) ↗

TIME SAVED

Research-anchored expert-equivalent effort

28.1h

Conservative **13.7h** Typical **28.1h** Optimistic **44.6h**

The sum of the published per-task time-saved bands across your sessions — every minute traces to a cited study.

COST REDUCTION

Professional-services equivalent

\$2,670

Assisted value at expert rate — what a specialist would charge for the same deliverables

28.1h × your rate · range \$1,302–\$4,237

18

COWORK SESSIONS

40

TASKS COMPLETED

ACTIVE DAYS

28.1h

EXPERT-EQUIVALENT
HOURS
delivered by Cowork

4.1h

HANDS-ON HOURS
your time (est.)

Secondary — speed multiplier: your ~28.1h of research-anchored expert-equivalent effort against an estimated ~4.1h of hands-on time is a **6.8×** multiplier. The expert clock is the sum of cited per-task time-saved bands; the assisted clock is a **modeled** estimate (OneDrive does not record keystroke time; measured where the telemetry hook is enabled), so treat the multiplier as directional, not a stopwatch.

YOUR PROJECTS — ONE VIEW

Your projects

H 15 needed Cowork **M** 0 moderate fit (multi-file / automation) **L** 3 a single Copilot could do it
? 0 insufficient evidence (rare — no basis)

All your projects in one table, each with a **Cowork-fit** dot — **H** needed Cowork · **M** moderate fit · **L** a single Copilot could do it · **?** insufficient evidence. **Hover any dot** for the specific reason. **Group by** process or category; the rows regroup in place, so you read the list once. Value follows your hourly rate.

GROUP BY

Process

PROJECT	COWORK-FIT	HOURS	VALUE
Technology & Engineering 3 projects		11.1h	40%
Debug and refactor the Python ETL pipeline that loads campaign telemetry into the warehouse	H	5.6h	\$532
Write a Python script to parse the survey exports and generate a CSV of NPS by segment	H	4.7h	\$447
Set up a recurring scheduled prompt to build my task list and schedule calendar events for launch week	H	0.8h	\$76
Finance & Business Value 3 projects		4.5h	16%
Build the ROI business case and cost analysis for migrating the reporting stack to Fabric	H	1.5h	\$143
Build the FY26 pricing model spreadsheet with tiered discounts and margin scenarios	L	1.5h	\$143
Benchmark and compare the three shortlisted CDP vendors against our requirements and cost	H	1.5h	\$143
Stakeholder & External Relations 2 projects		3.0h	11%
Synthesize the FY26 competitive landscape briefing from 7 analyst reports and our win/loss data	H	1.5h	\$143
Prepare a meeting briefing from my calendar and the attendee LinkedIn profiles for the QBR	H	1.5h	\$143
People & Talent Management 2 projects		1.6h	6%
Synthesize the quarterly business review deck from the 6 regional performance reports	H	1.5h	\$143
Triage the escalations Teams channel and post a summary of open blockers to the leadership chat	H	0.1h	\$10
Customer Success & Support 1 project		1.5h	5%
Triage my Outlook inbox, summarize the overnight threads and draft replies to the top 5 customer emails	H	1.5h	\$143
Procurement & Vendor Management 1 project		1.5h	5%
Summarize the long procurement email thread and draft a reply to the vendor with our decision	H	1.5h	\$143
Analytics, Insights & Reporting 1 project		1.4h	5%
Automate the weekly Power BI pipeline report as a recurring scheduled prompt with a Dynamics 365 connector	H	1.4h	\$133
Strategy & Planning 1 project		1.2h	4%
Summarize the launch-readiness Teams channel and post an announcement to notify the team of the go/no-go	H	1.2h	\$114
Sales & Customer Engagement 1 project		0.9h	3%
Recap the customer advisory board meeting transcript and extract action items with owners and due dates	H	0.9h	\$86
Capability & Skill Development 1 project		0.8h	3%
Package the monthly campaign digest as a reusable skill and draft the launch newsletter	H	0.8h	\$76
Product & Service Development 1 project		0.4h	1%
Draft the product one-pager for the new analytics add-on for the sales enablement kit	L	0.4h	\$38
General Productivity 1 project		0.1h	0%

PROJECT	COWORK-FIT	HOURS	VALUE
Quick question on how to format a nested bullet list in a document chat-only	L	0.1h	\$10

Roles Cowork assembled for me

The professional roles Cowork stood in for — the specialist hats it wore so the work got done without added headcount — and **which project each went into**. **Projects run down the side** (most hours first), **roles across the top** (top 7 by hours; the rest fold into **Other**). A darker cell = more of that role's expert-hours in that project; the **Role total** row is the total time each role covered.

PROJECT \ ROLE	Technical Writer	Software Engineer	Data Analyst	QA Engineer	Knowledge Worker	Total
Debug and refactor the Python ETL pipeline that loads campaign telemetry into the warehouse Technology & Engineering		2.8		2.8		5.6h \$532
Write a Python script to parse the survey exports and generate a CSV of NPS by segment Technology & Engineering	2.3	2.3				4.7h \$446
Build the ROI business case and cost analysis for migrating the reporting stack to Fabric Finance & Business Value		0.8	0.8			1.5h \$142
Synthesize the FY26 competitive landscape briefing from 7 analyst reports and our win/loss data Stakeholder & External Relations	0.8		0.8			1.5h \$142
Triage my Outlook inbox, summarize the overnight threads and draft replies to the top 5 customer emails Customer Success & Support	0.8		0.8			1.5h \$142
Build the FY26 pricing model spreadsheet with tiered discounts and margin scenarios Finance & Business Value		0.8	0.8			1.5h \$142
Prepare a meeting briefing from my calendar and the attendee LinkedIn profiles for the QBR Stakeholder & External Relations	0.8		0.8			1.5h \$142
Synthesize the quarterly business review deck from the 6 regional performance reports People & Talent Management	0.8		0.8			1.5h \$142
Summarize the long procurement email thread and draft a reply to the vendor with our decision Procurement & Vendor Management	0.8		0.8			1.5h \$142
Benchmark and compare the three shortlisted CDP vendors against our requirements and cost Finance & Business Value	0.8		0.8			1.5h \$142
Automate the weekly Power BI pipeline report as a recurring scheduled prompt with a Dynamics 365 connector Analytics, Insights & Reporting		0.7	0.7			1.4h \$133
Summarize the launch-readiness Teams channel and post an announcement to notify the team of the go/no-go Strategy & Planning			1.2			1.2h \$114
Recap the customer advisory board meeting transcript and extract action items with owners and due dates Sales & Customer Engagement	0.5	0.5				0.9h \$86
Set up a recurring scheduled prompt to build my task list and schedule calendar events for launch week Technology & Engineering	0.4	0.4				0.8h \$76
Package the monthly campaign digest as a reusable skill and draft the launch newsletter Capability & Skill Development	0.8					0.8h \$76
